Claims 1, 8, 18, 19, 22, 23, 25 and 26 are now  
in this application.

Objection is made to the title as being too  
general to indicate the nature of the invention being  
claimed. Correction is required.

All the claims in this application are allowable  
and the Secrecy Order has been rescinded. This application  
is accordingly ready for issue except for certain papers  
in the file which contain security classification markings  
and which therefore cannot be placed in public records  
such as the Patented Files (Sec. 109, MPEP).

Applicant should direct the cancellation of the  
security markings if this is appropriate, or should take  
steps to have the application withheld from issue.

As all the claims are allowable, prosecution on the  
merits is closed in accordance with the decision in  
Ex Parte Quayle 1935 C.D. 11.
