MEMORANDUM FOR MEMBERS OF THE PATENT BOARD

1. There is to be a meeting of the Patent Board called shortly for consideration of the following cases:

a. An invention by Captain H. G. Miller and Mr. W. F. Friedman, entitled "System and Means for Enciphering and Deciphering Magnetically Recorded Signals".

b. An invention by Dr. H. J. E. Golay, entitled, "Methods and Means of Observing at a Distance and Recording of Wind Direction and Speed, and Gaseous Flow in General."

c. An invention by Col J. C. Kauborgne and Mr. W. F. Friedman of a system for enciphering matter electrically transmitted by facsimile or telephoto means.

d. An invention by Mr. W. F. Friedman of a system and apparatus for enciphering and deciphering telephoto transmitted messages, sketches, photographs, documents, etc.

e. An invention by G. D. Barbulesco entitled "Improvement in Instrument Landing System Altitude Indicator".

f. An invention by J. W. Grieg of a magnetic compass.

2. The related papers are attached.

3. If the members can agree on the action to be taken, an actual formal meeting will not be necessary.

H. P. Browning,  
Major, Signal Corps
