ARMY SERVICE FORCES
SIGNAL SECURITY AGENCY
WASHINGTON 25, D. C.

SPSIB-4

14 May 1945

SUBJECT: Intercept Assignment at Monitor Station Five
THRU: Chief, Intelligence Division, SPSIS-9
TO: Director of Communications Research, SPSIS-3

Handwritten initials: HSA

1. Attached as Tab "A" is the intercept mission in effect at Monitor Station Five during December 1941.

2. Tab "A" includes an outline of the intercept and traffic forwarding directive in effect at Monitor Station Five on 1 December 1941, together with all changes made during that month. This outline was prepared from a basic assignment dated 7 October 1940 which superseded all previous assignments to that station, and subsequent changes thereto which were sent by radiogram. Two radiograms, dated 1 April 1941 and 17 June 1941, are missing. Efforts are being made to locate these in the War Department Classified Message Center.

3. A summary of the intercept traffic received from Station Five during December 1941 is available if desired. This summary has been prepared from log sheets furnished by that station which listed each message individually together with the following identifying items:

- a. Address
- b. Sending and receiving call signs
- c. City of origin
- d. First two groups of texts
- e. Signature

4. This information was obtained from material in the Communications Branch central file. These files are being retained temporarily in SPSIB-4 and are available for your inspection.

Handwritten signature of Robert T. Walker

ROBERT T. WALKER
Major, Signal Corps
Chief, Traffic Analysis
and Control Branch

1 Incl
Tab "A"

TAB "A"
